SUMMARY

Web developer with 7+ years of freelance experience building responsive, production-grade applications and the infrastructure behind them, plus 5–6 years of systems administration. I design, build and deploy professional websites end to end, and I bring an operator's discipline to that work: reliable hosting, clean documentation, maintainable code and clear client communication. Comfortable across the whole stack — from Linux servers and cloud infrastructure to responsive front ends.

EXPERIENCE

Freelance Web Developer

Present · Remote

Independent · Remote worldwide

- Design, build and launch professional websites for businesses and independent teams, from first conversation through deployment and refinement.
- Shipped the Seamoon Shipping company website end to end — information architecture, design, development and production deployment.
- Built a personal portfolio platform with a browser-based admin panel for managing published projects.

Partner & Systems Administrator

2021 – Present · Dubai

Sea Moon Shipping L.L.C

- Run the company's systems, networks and Windows environment for daily shipping operations.
- Drive the company's digital side, including the public website at seamoonshipping.com.

IT Specialist

Dec 2020 – Jun 2021 · Dubai

Aviv Global Shipping LLC

- Administered servers and Windows environments for a global shipping company, keeping day-to-day operations dependable.

IT Specialist (part-time)

Mar 2020 – Oct 2020 · Dubai

Click Marine LLC

- Provided systems support and administration for a marine services company.

PROJECTS

Seamoon Shipping — company website seamoonshipping.com ↗

Full digital presence for a shipping company: direct communication, credible presentation and a clear path to contact. Designed to be maintained — a focused visual system that accepts new pages without losing coherence. Responsive across desktop and mobile.

Personal portfolio & project manager source on GitHub ↗

Multi-page portfolio built with semantic HTML, modern CSS and JavaScript, with scroll-driven GSAP animation, accessibility features (skip links, reduced-motion support) and a localStorage-backed admin panel that exports site content as JSON.

SKILLS

Web development	React.js & Angular.js, HTML5 & CSS3, modern JavaScript, responsive cross-browser UI design, web performance, GSAP animation
Systems & Cloud	Linux server administration & hardening, Windows environments, networking, AWS (EC2, S3, EBS, ELB, RDS), Terraform & Ansible, CI/CD pipelines, system monitoring & alerting, deployments, self-hosted services
Ways of working	Technical writing, documentation, troubleshooting, database management, client communication, visual direction

How I work: written decisions, small feedback loops and a clear definition of what finished work needs to do. Systems-minded by background, detail-driven by habit.
